

I support XM Radio's First amendment right to open speech and broadcast. Quit trying to censor what is broadcast on AM, FM, and satellite radios. People listen to all sorts of music, talk shows, comedy, weather, and traffic. They tune in because they enjoy the program and know what to expect. Censorship is against the law and protected by the first amendment of free speech. Reject the NAB's petition 04-160 or you are condoning censorship.
Respectfully,

Shane Johnson
